## Planning, Scheduling, and Tracking Software made easy!

### From Problems to Prosperity

**Question:** What do Sept 11, Global Flu Pandemic, Feeding the Hungry, Hurricane Katrina, and The War on Terror have in common?

**Answer:** These are problems that our customers are turning into prosperity!

**Sept 11 - Problem into Prosperity:** Banker Steel, Lynchburg VA, is a large steel fabricator supplying beams for the new Freedom Tower being built at the former site of the World Trade Center. They are using Resource Manager-DB as an add-on to their FabTrol ERP System to give them better vision of shop loading hours and realistic job completion dates.

**Global Flu Pandemic - Problem into Prosperity:** Triosyn Corp - a Division of Safe Life Corp, manufactures masks to prevent the spread of H1N1(Swine Flu). They are working with US to implement Resource Manager as their core ERP System including: MRP, Inventory Control, Purchasing and Receiving, Shop Scheduling, and even Lot Number Traceability.

**Feeding the Hungry - Problem into Prosperity:** Autec Plastics, New York, uses Resource Manager-DB for scheduling and inventory management of their injection molding facility where they supply Walmart with plastic dinner ware. Well, OK, maybe that doesn't quite qualify as feeding the hungry, but who is to judge?

**Hurricane Katrina - Problem into Prosperity:** Swanson Group in Oregon operates several lumber mills. Using Resource Manager-DB for scheduling, they are able to proactively and profitably respond to demands driven by National Catastrophes such as Hurricanes, Floods, Tornadoes, Earthquakes, and even a rash of do-it-yourself-ers making a run at the local Home Depot. Jeff Swanson says, "The flexibility of the system to meet our unique needs is excellent."

**War on Terror - Problem into Prosperity:** BAE Systems/Ordnance Systems Inc. (suppliers for the U.S. Armed Services) found Resource Manager-DB to be the best fit for enabling manufacturing personnel to systematically identify process, equipment, labor, and material limitations when responding to customer order delivery inquiries. Resource Manager-DB integrates directly with 4<sup>TH</sup> Shift ERP Software.

Marc Phillippi, ERP Systems Manager reports "We now have a product that we are extremely satisfied with and are pleased to recommend to others looking for a capacity and production planning solution"

**What about you?** What kind of problems do you have that can be turned in prosperity? Customer delivery challenges? Operational inefficiencies? Labor and shipping costs out of control? Too short or too much inventory? Spending too much time and money trying to generate a decent production schedule?

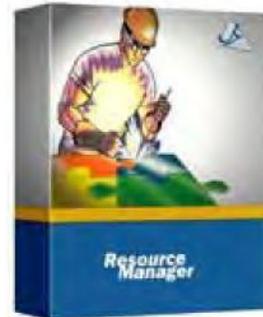

Why don't you contact US today so we can talk about helping you turn those problems into prosperity? What have you got to lose (besides problems)?

**Since 1991, we have been helping thousands of manufacturers, just like you, solve their** manufacturing and operations management challenges simply, quickly and affordably. We've helped everyone from small companies with no formal systems in place, to large companies with installed ERP Systems.

From a simple Excel Template for Project Management to a fully integrated solution that works just right for your planning and scheduling challenges, we offer you a risk free, fast track approach to address your most critical needs.

Our customers have recognized three unique benefits:

1. The ability to solve their planning and scheduling challenges in less than one month.
2. Less cost (training and implementation included with every sale).
3. And lastly, software that adapts to **the customer's** current systems and procedures. This virtually eliminates any pain in learning a 'new' system.
